

Plastic Anti-Ligature Tethers

Designed with patient well-being & safety in mind

CleanGrip Plastic Anti-Ligature Tethers

Safe and easy to grab, the Crest CleanGrip is a highly visible and cleanable alternative to nylon station pullcords. The CleanGrip tether is constructed of 12 mm wide PVC that is 1.8 mm thick. It is easily disinfected by germicidal detergent, disposable wipes or disinfectant cleaner. The anti-ligature safety feature is created with strategic placement of "breaks" every 4" along the length of the cord when 22 lbs of force is exerted. CleanGrip is available in non-preassembled configurations and in bulk rolls.

- Bulk tether can be cut to any desired length
- Available in red or blue to provide contrast for high visibility
- Adapter connects to CleanCord™ Pullcords, as well as functioning as a pendant & bead chain adapter
- Compare with Sanipull® for a better value

CLEANGRIP™

Installation Instructions

Video Available on **YouTube**

#6 Bead Chain

Insert #6 Bead Chain into adapter through small hole on top then attach coupling unit to bead chain. Rest coupling unit within adapter. Fold CleanGrip tether twice. Insert into adapter next to coupling. Snap adapter closed.

Spring Clip

Insert tether through black cover piece and pull through. Take tether and thread through outside slot towards the top of the spring clip. Once through, take tether and thread through inside slot toward bottom of spring clip. **Tip: we recommend using a thin nose plier to thread tether through spring clip.** Pull tether to the edge of the imprint and tighten any excess slack while holding threaded end. Slide black cover all the way up and push tight.

Screw & Nut

Trim the CleanGrip tether, if needed, in a straight line. Using a $\frac{3}{32}$ " drill bit, drill a hole centered $\frac{1}{4}$ " from the end of the CleanGrip tether. Insert provided screw through the security clip and CleanGrip hole. With black sleeve facing downward, secure nut to the screw.

Plastic & Nylon Pullcords

Insert thin nylon cord into adapter through small hole on top. Tie knot and rest cord within adapter to prevent pull through. Fold CleanGrip tether twice. Insert into adapter next to nylon cord. Snap adapter closed.

Tether

Fold CleanGrip tether twice. Insert into adapter and make sure it is snug. Snap adapter closed.
